PROJECT DESCRIPTION

I. GENERAL

This project involves the modification of the existing traffic signal to provide Emergency Vehicle Pre-Emption at the intersection of MD 5 (Branch Avenue) and MD 373 (Accokeek Road) in Brandywine, Maryland. MD 5 is assumed to run in a north-south direction.

II. INTERSECTION OPERATION

- 1. The intersection is to operate in a NEMA 7-phase, semi-actuated mode, with exclusive left turn phasing for the northbound MD 5 and exclusive-permissive left turn phasing for the MD 373 approaches.
- 2. The existing NEMA full-traffic-actuated, eight (8) phase controller housed in a NEMA 6 base mounted cabinet will be utilized at this location.

- The contractor shall be responsible for terminating all signal cable to the appropriate terminals and properly labeling each cable.
- 2. All underground and overhead utilities shown on these plans are schematic only and may not be complete. The Contractor shall be responsible for notifying Miss Utility prior to construction so that all utilities may be located in the field. If the Contractor perceives that a conflict between the utilities and the traffic signal will occur, the Contractor shall notify the Project Engineer immediately so that the conflict may be resolved.
- The contractor shall maintain the continuous operation of all interconnect, vehicular, pedestrian detectors, and lighting devices. If any device is damaged by the contractor, it shall be repaired within 72 hours by the contractor at no cost to the Administration after notification by the Engineer.
